Back Submit

Click on "Submit" button.

The screenshot shows a web interface for submitting a quote in an auction. At the top, it displays tender details: Tender ID (2019_COIS_63526_1), Tender Reference Number (Demo_Tender), Tender Title (Demo Tender), Item Code (item2), Auction Type (Reverse), and Start Price in ₹ (27). Below this is a yellow header for 'Auction Value Signing'. A modal message box is open, displaying 'Auction Value signed successfully.' with an 'OK' button. A blue arrow points from a text box 'Updating Auction Value, click "OK".' to the 'OK' button. Another blue arrow points from a text box 'Click on "Submit" button.' to the 'Submit' button at the bottom right of the interface. The interface also includes a 'Back' button, a text input field containing '22', and a warning icon.

Back

- Quotes for individual items can be submitted by clicking on Hammer icon against individual item
- Once Quote is submitted, status is updated on auction screen as seen earlier
- Also overall auction screen is also updated with the quote details as seen in the screen besides

Starting Price:

As the name describes, Reverse Auction starts from this value. By default, Starting Price will be L1 price emerged from the rates quoted by the bidders in BOQ. This may be reduced, if required.

Current Price:

Current Price available against any line item (lot) under “Live Auction” tab shows the latest L1 value received against that lot.

Decremental Value/ Decremental Price / Decrement Price:

This value shall be specified by Tender creator while maintaining auction basic details. It is the minimum value (in Rs.) which shall be decremented by any competing bidder from “Current Price” while entering his quote. The bidder can decrement only in multiples of this value.

My Auction Price:

Bidder enters and submits their quote in the space provided against “My Auction Price”.
E.g. If Current Price at a moment is X and Decremental value = Y. Then Bidder shall be able to enter My Auction Price = Z where $Z = X - n * Y$ and n is an integer greater than zero (0).

Elapse Time in Minutes and Auto Extension Time in Minutes:

These values (in minutes) will be specified by Tender creator while maintaining basic details.

Elapse Time is the quantum of period before Auction End Time.

Auto Extension Time is the quantum of period by which the auction End Time will get extended in case of any quote received during Elapse Time.

E.g. Let Auction period is from 11:00 Hrs. to 13:00 Hrs., Elapse Time is 5 Minutes and Auto Extension Time is 10 Minutes.

If any quote is received between 12:55:01 and 12:59:59, Auction End Time will be extended up to 13:10 Hrs. otherwise the auction will end at preschedule time i.e. 13:00 Hrs.

Auction Start Date:

Auction gets available under “Live Auction” tab and open for bidders to quote from this time onwards.

In case of multi lot auction, this will be the earliest auction start time of each of the line items (lots).

Auction End Date:

Auction window available to the bidder expires and auction shall not be available under “Live Auction” tab from this time onwards subject to auto extension of the auction.

In case of multi lot auction, this time will be auction end time of the line item (lot) whose auction is going to end at the last.

Maximum Seal Percentage:

Maximum Seal percentage restricts the bidder from quoting abnormally low price in one go by mistake. This value is to be specified by tender creator while maintaining auction basic details. If Maximum Seal Percentage defined in an auction = p, Decremental Value = Y and Current Price at any time = X. Then bidder cannot quote a price less than $[(100-p) \% \text{ of } X] - Y$. If a bidder quotes a price less than this, system will not accept it.

E.g. Maximum Seal Percentage = 25%

Decremental Value = 500

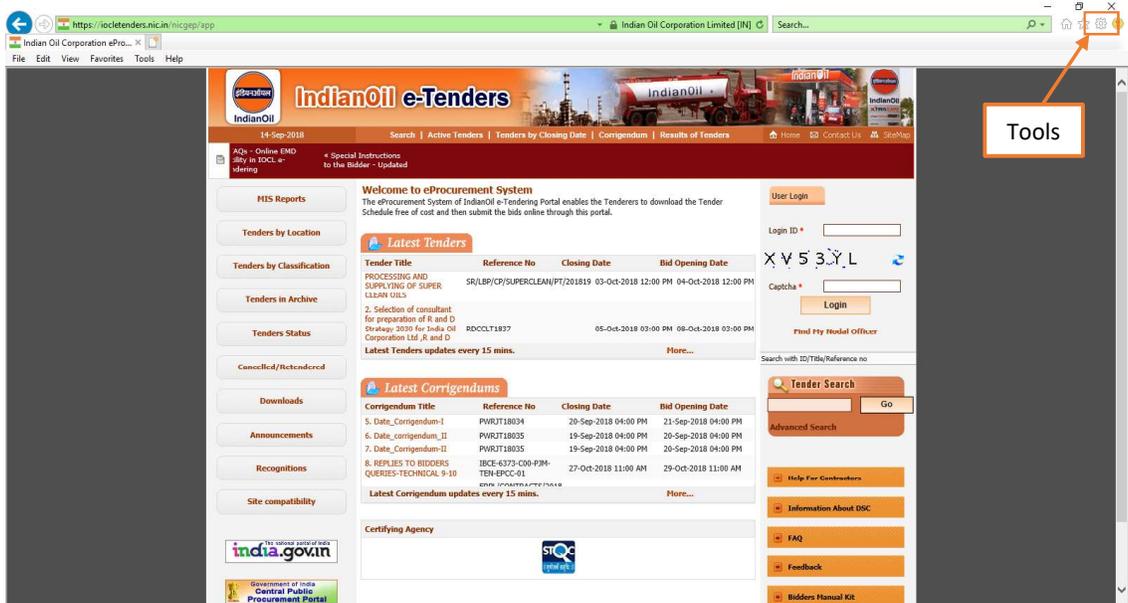

Current Price = 10000

The Bidder can't Quote below 7000 i.e. $[(100-25) \% \text{ of } 10000] - 500$.

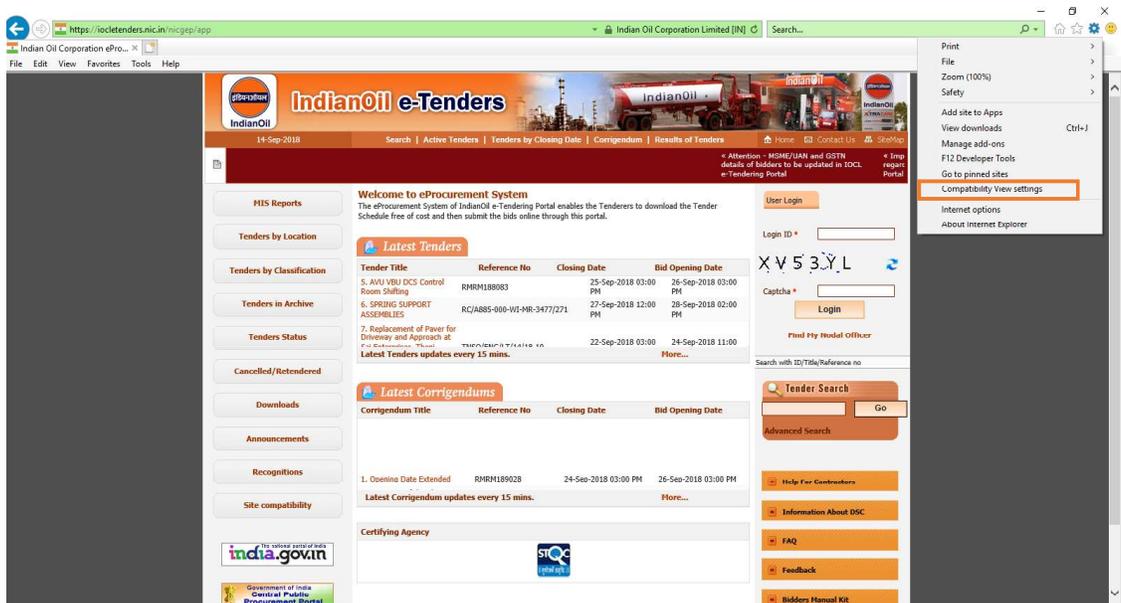

CASE: Display Issues during Live Reverse Auction, “Online Bidder Enrollment” / and/or “Generate / Forgot Password” link not available in home page of e-Tendering Portal. / other issues related to display of content on screen

To resolve issues during live Reverse Auction / Enable Online Bidder Enrollment and Generate / Forgot Password link in browser Internet Explorer (11 and above), please follow below procedure:

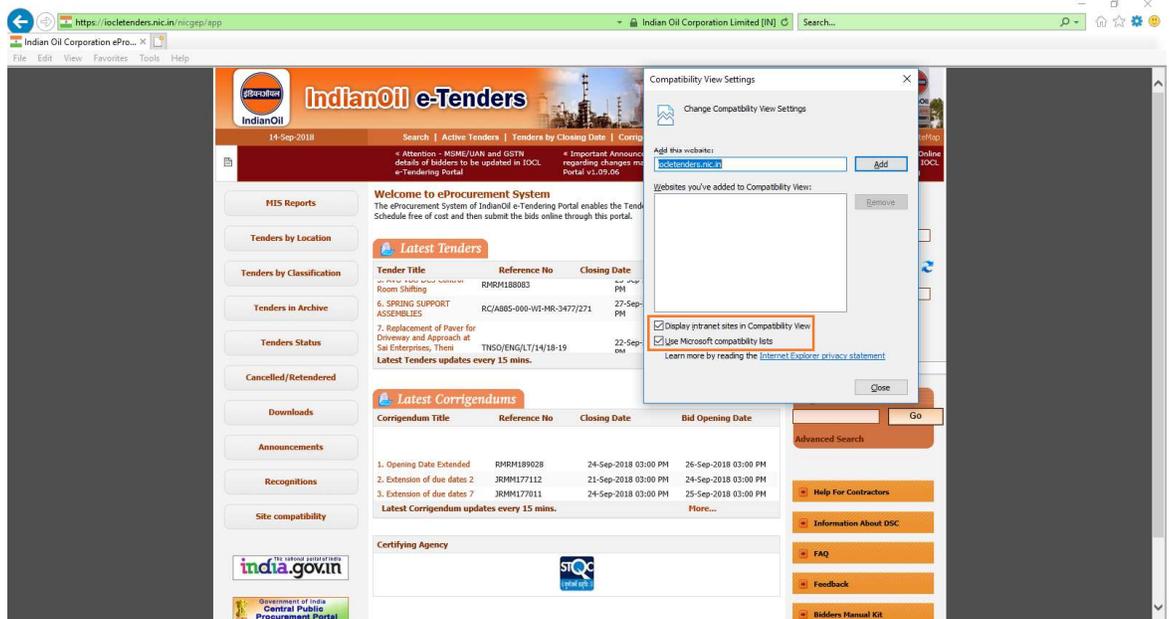

1. Open Internet Explorer and click on “Tools” icon (refer below screenshot)-

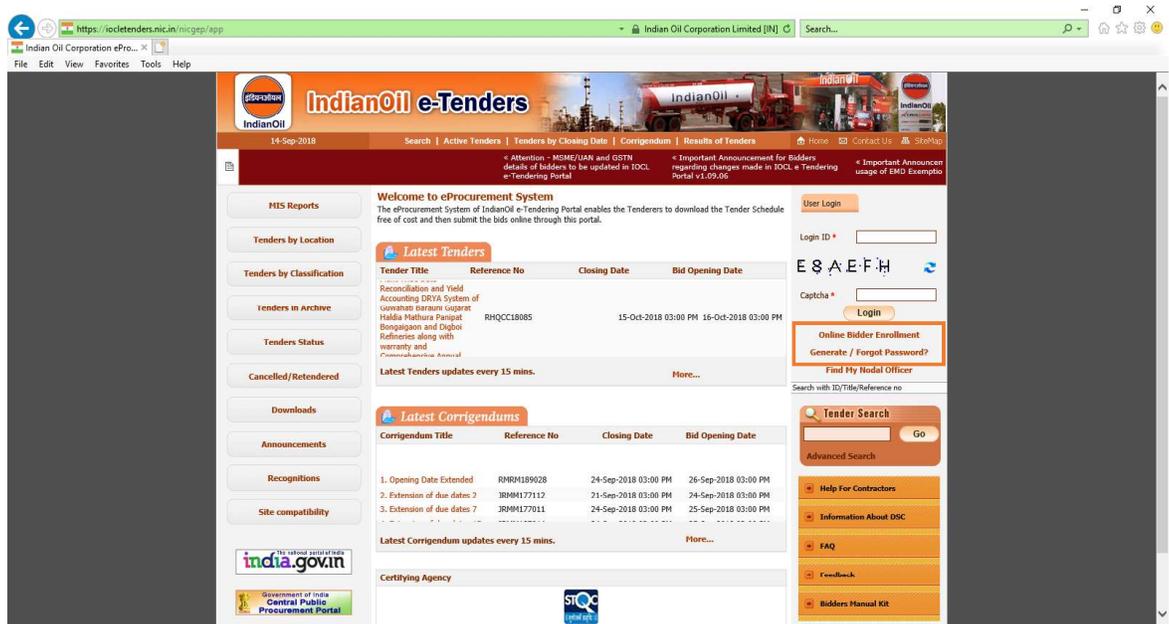

2. Click on “Compatibility View Settings”-

3. a). Uncheck on "Display intranet sites in Compatibility View" and "Use Microsoft compatibility lists"
- b). Remove the IOCL e-Tendering site from compatibility view (if it is there)
- c). Click on "Close"

4. a). Both the Links will be available now-

- b). Similarly, quote display related issues during live auction will also be resolved.
