Center LLP

Introducing

## India's FIRST Common Collection Center

Authorised by

**KARNATAKA STATE POLLUTION CONTROL BOARD**

(Vide Authorisation No. PCB/WMC/SEO/2014-15/HD; Reg-No-87602/H09 dated 06 APR 2015)

**RECYCLE !  
MAKE EVERY  
DROP COUNT !**

### BENEFITS OF RECYCLING USED/WASTE OIL:

- Preserve natural resources, our rich heritage
- Reduce impact on the environment
- Reduce Imports. Save foreign exchange
- Reduce virgin base oil usage by upto 80%

**Be an awakened & responsible Indian citizen.**

**Join us in our effort to save the EARTH**

**Where others see  
waste, we see a  
VALUABLE  
RECYCLABLE  
RESOURCE**

## WHO WE ARE ?

**KarRecycle Center LLP** is a Karnataka State Pollution Control Board (KSPCB) Authorised Consortium of Lube Oil Manufacturers, Generators and Responsible Recyclers of Karnataka, for the collection of used oil /waste oil for recycling in a scientific manner and safe disposal of related wastes that could otherwise harm the environment.

All above mentioned Stake holders have come together with their expertise in waste oil management to achieve common good for the society.

### Mission

We promote and encourage environmentally responsible management of used lubricating oils / waste oils and related waste in Karnataka State.

### Vision

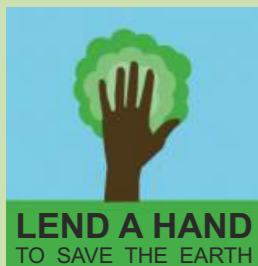

Ensure that all available used lubricating oil and related waste is managed in an environmentally responsible manner.

### Strategic Objectives

- Influence the collection of all collectable used lubricating oils with a completely transparent and self regulated operation that accounts for every drop of recyclable waste
- Professionally driven high operation standards at all stages from collection, storage, selection, transportation to re-refining in an environmentally responsible manner
- Continue to create an awareness that used oil is a hazardous waste. Support Government in implementing laws to manage used oil & related wastes in an environmentally responsible manner.
- Develop sustainable partnerships with GROUPS that have similar objectives and like mindedness
- Expand the network of Collection Centres and Drop Off sites throughout Karnataka.

### Core Business Principles

- Support Government in Developing responsible environmental laws, regulations and standards.
- Determine a healthy price mechanism for used oil / waste oil recycling by fixing a suitable incentive for the Generator
- Conduct our business in a manner that protects the environment as well as the health and safety of the community and ensure that the community grows.
- Support the upliftment of Collectors in the used oil and related waste industries.
- Make expansions that further KarRecycle's Environmental Objectives.
- Support initiatives that promote responsible used oil management in other states.
- Review and adopt global best practice in the recycling of used oil and related waste.

**SHOW YOU ARE AN AWAKENED CITIZEN**

## OUR SUPPORTERS

**KarRecycle LLP's FIRST COMMON COLLECTION CENTER** was formally dedicated by Shri. Ramanath Rai, Environment Minister, Govt. of Karnataka on 23rd Jan 2015. This initiative of starting A First of its Kind **AUTHORISED COMMON COLLECTION CENTER** in India was lauded as a bold step in the right direction. Full support and encouragement has been extended by the Govt of Karnataka as well as KSPCB & CPCB, for this social cause endeavour. Similar Groups from other States too have evinced interest to replicate our Model.

◀ *Inauguration of the Peenya Collection Center: Shri Ramanath Rai, cutting the tape with Mr. Vijay Kumar, IFS; Member Secretary, KSPCB. Others who presided over the function included Mr S Suresh, South Zone Officer, CPCB, & Mr Venkatesh Shekar, SEO, WMC, KSPCB.*

## What the LAW says?

**Dispose Hazardous Wastes complying with THE HAZARDOUS WASTE MANAGEMENT & HANDLING RULES FOR RECYCLING 2008 under Environment (Protection) Act, 1986 and further amendments, framed by the Ministry of Environment & Forests, Govt. of India monitored by Central Pollution Control Board & State Pollution Control Board's.**

IN THE SUPREME COURT OF INDIA CIVIL ORIGINAL JURISDICTION WRIT PETITION NO. 657 OF 1995 **ORDER** Hazardous Wastes are highly toxic in NATURE. The industrialization has had the effect of generation of huge quantities of hazardous wastes. These and other side effects of development gave birth to principles of sustainable development so as to sustain industrial growth. The hazardous waste required adequate and proper control and handling. Efforts are required to be made to minimise it. In developing nations, there are additional problems including that of dumping of hazardous waste on their lands by some of the nations where cost of destruction of such waste is felt very heavy. These and other allied problems gave birth to Basel Convention signed by India on 15th March, 1990 and ratified on 24th June, 1992. Its key objectives are :

- \* **To minimize the generation of hazardous wastes in terms of quantity and hazardousness;**
- \* **To dispose of them as close to the source of generation as possible;**
- \* **To reduce the transboundary movement of hazardous wastes."**

## You are OBLIGATED to Act RESPONSIBLY

The Ministry of Environment, Forest and Climate Change is mandated to protect and improve the Environment and to Safeguard the forest and Wildlife of the country under Article 48-A of the Constitution.

Article 51-A (g) of the constitution has also enshrined protection of natural environment as a **FUNDAMENTAL DUTY** of every citizen. The clause says that **"It shall be the duty of every citizen of India to protect and improve the natural environment including forest, lakes, rivers and wildlife and to have compassion for living creature."**

The principle of sustainable development has been linked to **'Right to Life'** under Article 21 of the Constitution.

## Why should we RECYCLE Used OIL?

As per **LAW** it would be **ILLEGAL** to dispose of **USED** oil unscientifically or simply dump it.

Classified as **HAZARDOUS WASTE**,  
**RE REFINING** is **SAFEST & BEST** Option.

### Understanding the Impact of Recycling Today

In  
**INDIA**

**470,000**  
Tonnes of used oil are improperly disposed of each year.

From the total volume of lube oil consumed in **INDIA**,  
**5 Lakh tonnes\*** of **USED OIL** can be collected and **RECYCLED** to obtain approximately **3.5 Lakh tonnes** of **BASE OIL**

It takes  
**42 Litres** of Crude Oil, but only  
**1 Litre** of used Oil to produce  
**650 ml.** of New, high-quality Lubricating Oil.

**Reduce Import of BASE OIL. Save Foreign Exchange & HELP THE NATION**

### ITEMS\* WE COLLECT FOR RECYCLE / RE-REFINE

Used & waste industrial / automotive oils

#### Used Oil:

- Engine Oil
- Hydraulic Oil
- Lubricating Oil
- Transformer Oil
- Used Cutting Oils
- Gearbox & Transmission Oils
- Used Cooking Oil

#### Waste Oil:

- Heavy, Medium & Light Fuel Oil Sludge
- Tank Bottom Sludge
- Slop Oil / Balgee from Marines & Tank Bottoms

Used & Drained Oil / Fuel Filters

#### RELATED ITEMS\*

#### WE COLLECT FOR SAFE DISPOSAL:

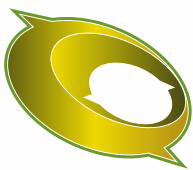

- Soaked Cotton waste
- Used Coolant & Glycols
- Fuel / Oil filters etc

Oil soaked Cotton Waste

For further information contact:

\* Subject to a preliminary scrutiny by our representative
